Kicking a bit of dirt or sand on the fire to put it out isn't smart because it stays hot for more than eight hours. If you or your kids later touch the dirt-covered fire for just a second, it can still be extremely hot and it will burn skin!

Be smart, only put your campfire out with water. In 10 minutes, it cools below 50 degrees and in eight hours it's harmless.

First aid

- > Stop, Drop and Roll
- > Extinguish areas with water if still on fire
- > Remove clothing unless stuck/melted

Apply cold water

Immediately run cool water over the affected area for about 20 minutes.

Cooling the burn is very important as it prevents the heat from burning into the skin's deeper layers.

NEVER USE ICE.

Remove anything tight

Such as jewellery, bracelets, etc. Burns quickly cause the skin and tissue underneath to swell.

Cover the burn

After cooling the burn for 20 minutes cover the burn. If the burn is on the face, cover it with a clean, damp cloth.

If the burn is on any other part of the body, cover it loosely with clean plastic cling wrap.

NEVER use butter, oils, toothpaste, creams or ointments to cover the burn. These may hold the heat in and cause further damage to the skin.

Go to your doctor or hospital

Go to your doctor or hospital if the skin is broken or if you are concerned. Infection may change a superficial burn into a deep burn.

Firefighters say there are seven basic rules for building a safe campfire:

1. Fires should be lit in cleared areas, where there are no overhanging branches and minimal grass and scrub.
2. Ensure the campfire is a safe distance from tents, and that any other camping equipment is stored well away from it - especially flammable items such as gas cylinders, fuel cans etc.
3. Where possible use a fireplace such as a barbecue pit or build a surround out of large rocks.
4. Never use any kind of flammable liquid on a fire - even when you are trying to get it started.
5. Have a bucket of water and a shovel nearby.
6. When you have finished with your campfire put it out with a good amount of water... not sand or dirt.

Remember regulations surrounding campfires are in place during the fire danger season and on a day of total fire ban it's illegal to have a campfire unless you hold a permit.
